To the left, you can see all the courses for Floral St. The concept of dependency is to match all courses that are associated with a particular section of morning meeting. We referred to this as "elementary magic" earlier.  This will make enrollment much easier.  This will work at the middle school level for 30-day experiences that all students get.  Even better if they traveled as HR groups to specials!

1. Notice how we have created courses call L/R with times. These represent the 9 lunches at Floral, all of you will have fewer courses.   Lunch/Recess 1 will be 98X01 (X being your school code).  Sooner rather than later, we will need YOUR lunches numbers and times.  The rationale behind adding the times to L/R is so that it will display in a Lunch Block on a student schedule in the middle of the day.

2.  Each course has several sections that are taught by teachers, in rooms, and specific periods of the week.  We will need this information. Here is an example of HE classes. The concept of Exp = Expression = Period and Day. When you make your Excel spreadsheets in the future, the Exp must be submitted exactly as displayed to the left. Period 6 on Wed must be displayed as P6(W).   The teacher name doesn't import as text, we will need teacher ID's.  We will work on these spreadsheets at our next Lead Secretaries Meeting, which has not been established by principals.  This does not apply to Oak or SHS.

3.  We need to know what rooms each of the specialist teach in.  This is especially important in those schools that have specialized rooms and multiple instructors for specials.  Art on a cart- assumption – taught in HR of that teacher!
